

KS: I can use a fraction wall and my times tables to find equivalent fractions

Fill in the fraction wall and then use this information to complete the equivalent fractions:

$$\frac{1}{2} = \frac{\square}{4} = \frac{\square}{8} = \frac{6}{\square}$$

$$\frac{1}{4} = \frac{2}{\square} = \frac{3}{\square}$$

Use the fraction wall to answer true or false to the following statements:

- a) Two quarters is equivalent to one half T/F
- b) Four sixths is equivalent to two thirds T/F
- c) Three fifths is equal to eight tenths T/F
- d) Six twenty-fourths is equal to one quarter T/F
- e) One fifth is half of one tenth T/F

Use your times tables to complete the missing numerators/denominators:

1) $\frac{2}{9} = \frac{8}{\square}$

2) $\frac{5}{7} = \frac{15}{\square}$

3) $\frac{\square}{8} = \frac{4}{32}$
